Alfred 2 Source Tree Workflow
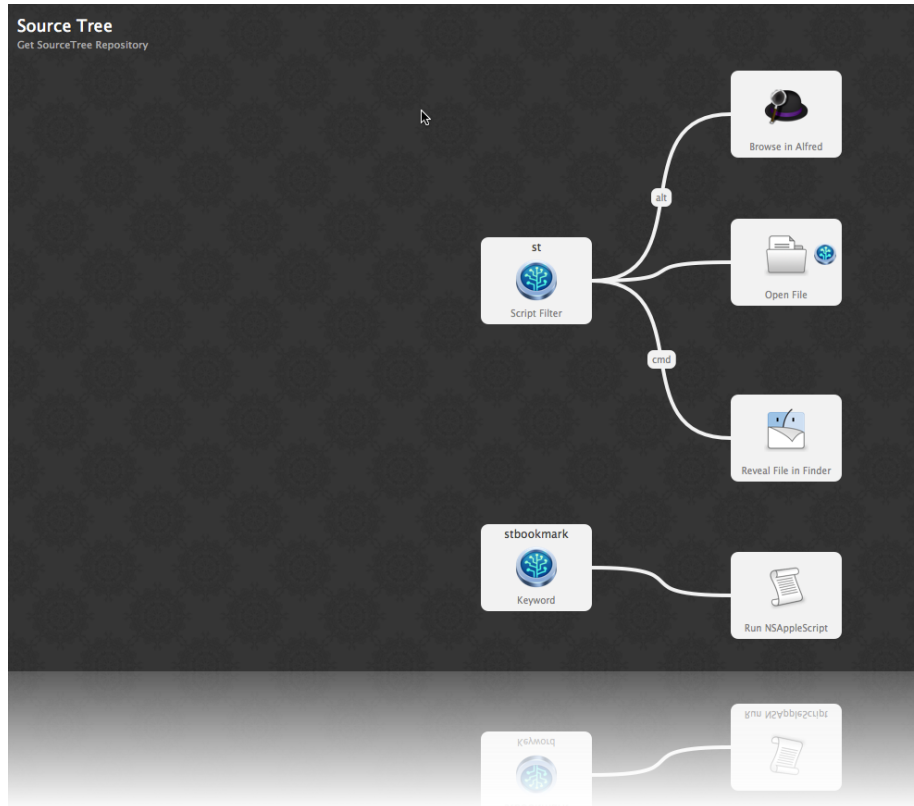

Alfred 2 Workflow to list, search, and open Source Tree repositories in Alfred.

Usage

0. Show Help

Just type `-?`, `-h`, or `--help` after the keyword to show help.

A. Keywords:

1. `st`: List and query source tree repositories.
   Feedbacks are cached. use `st !  {query}` to refresh.

2. `stbookmark`: Open query to source bookmark window.

B. Modifier Key

1. `command` : Reveal in Finder
2. `alt` : Browser in Alfred

Installation

Two ways are provided:

1. You can download the Source Tree.alfredworkflow and import to Alfred 2. This method is suitable for **regular users**.

2. You can `git clone` or `fork` this repository and use `rake install` and `rake uninstall` to install. Check `rake -T` for available tasks. This method create a symlink to the alfred workflow directory: "~/Library/Application Support/Alfred 2/Alfred.alfredpreferences/workflows". This method is suitable for **developers**.
